

- **New Silicone Lining**

- Enhanced feature to the 600D is the introduction of an initial to feet of silicone lining.
- With the introduction of a silicone lining burn-through is prevented due to temperature spikes from various fuels.
- The silicone lining will also be introduced into the cuff to make sure burn through isn't caused by the contact point with the heater.

- **Enhanced Maneuverability**

- Even with the introduction to a silicone lining, ABC's 600D fabric is a lightweight and flexible product.

- **Single Layer Design**

- The single-ply, urethane coated fabric maintains flexibility without losing its strength. The single layer is maintained throughout the remaining feet.

- **Sewn Construction**

- Manufactured utilizing a sewn heavy-duty wear-strip to offer additional abrasion resistance.

- **Product Life-cycle**

- The unique features result in superior life-cycle with its enhanced design. UV stabilization, and mold and mildew inhibitors.
