COLLABORATION. CUSTOMIZATION. RESULTS.

For over 35 years, ABC Industries has engineered PVC laminated fabric and coated mesh solutions for customers from a wide range of industries.

What makes ABC's products extraordinary is that not only are curtains made at our Indiana facility, but the fabric that goes into our curtains are manufactured in the same facility. ABC's vertical integration has allowed us the opportunity to manufacture a lighter, yet stronger curtain than others in the agricultural curtain market.

THE AGRI-TEX™ ADVANTAGE

- Unequaled tear resistance
- UV stabilized
- Superior tensile strength
- Excellent abrasion resistance
- High level of light transmission
- Weldable composition
- Easily collapsible
- Simple to repair
- Made in the USA

As an added value, Agri-Tex™ offers tunnel curtains in two different styles, customizable to fit your design specifications. For more information and for additional product options, please contact your sales representative.
