

TruOval MineVent®

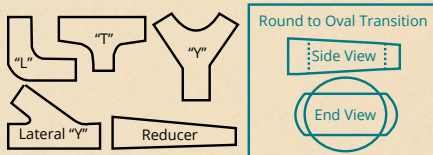

Layflat Blower Ducting

ABC industries, Inc. is proud to introduce TruOval MineVent®, a patented*, oval layflat blower ducting engineered to increase air distribution efficiency throughout your underground ventilation system. The unique construction features suspension cables spaced intermittently through the ducting to maintain its oval shape while reducing the amount of air flow friction. The oval configuration maximizes headroom in confined spaces and allows larger equipment to travel through the shaft without disrupting air flow. TruOval MineVent® ventilation ducting also features a series of easy-to-handle accessories that require less space, are more cost-effective, and smoothly transfer air through bends and turns.

TruOval MineVent's® welded construction reduces air loss and weakening associated with conventional sewn ducting. The durable RipStop substrate prevents small tears from expanding to major holes. Molecularly bonded for positive pressure applications, TruOval MineVent® is manufactured with ABC's VentaTex® material, which is designed to perform from -20° F to 180° F (-29° to 82° C) continuously. MineVent® fabrics have been tested and approved by Mine Safety and Health Administration Standards (MSHA).

**TruOval MineVent® is patented in the following countries:
U.S. 9,200,815
Canada 2,823,202
Australia 2013216596*

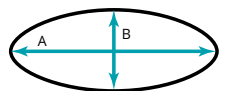

TruOval MineVent® Accessories

SPECIFICATIONS

Fabric	18 oz./yd. ² (610 g/m ²) 20 oz./yd. ² (678 g/m ²) 22 oz./yd. ² (746 g/m ²)
Scrim	9 x 9 RipStop, 9 x 9 UD
Film	PVC laminated to both sides of scrim
Color	Yellow
Length	25', 50', 100' (7.5, 15, 30.5 m)
End Finish	Wire Rope Coupling (Standard), Aussie Coupling, Snap-Loc Coupling, Soft Cuff, Velcro® Cuff, Velcro®/Zipper Cuff
Suspension	A-3 Hooks, Carabiner Suspension
