

VentaSpan®

Reinforced Vinyl Laminate

Offer your tent and structure customers durable, attractive options with laminated fabrics by ABC Industries, Inc. Our specially engineered VentaSpan® fabric provides resistance to UV damage and cold cracking. Available in a variety of construction weights, high strength substrates are available for the stresses of wide span fabric structures.

SPAN®

White

VENTASPAN®

Trust your fabric structure material to the proven choice in tent construction, 14 oz./yd.² (472 g/m²) VentaSpan® fabric. This versatile, lightweight product's translucent properties allow light to filter through for maximum brightness inside the structure. In addition to traditional white, VentaSpan® is available in a host of attractive colors.

VENTASPAN SUN-BLOC®

Prevent heat and sunlight from penetrating your structure by incorporating VentaSpan Sun-Bloc® into your design. The high opacity, 16 oz./yd.² (542 g/m²) material helps block the sun's radiant heat, making it the clear choice for warm weather climates. Special event planners prefer VentaSpan Sun-Bloc® for its ability to block natural sunlight, allowing the creation of intimate environments.
